

CLOUD SECURITY AND HEALTH ASSESSMENT

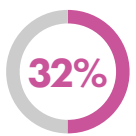

HYBRID INFRASTRUCTURE

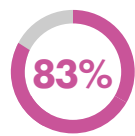

Reviewing your cloud environment to identify challenges and recommend remediations to increase your reliability and security while optimising cost.

HOW DOES THE SERVICE WORK?

Many businesses are finding public cloud less straightforward than they first thought, with issues pertaining to reliability, security and cost. Research shows that:

32% of all cloud spend is going to waste

83% of organisations cite a cloud skills challenge

69% are choosing to work with a partner to close this gap.

With our Cloud and Security Health Assessment, we can help you to identify and recommend remediations to your environment.

We do so in accordance with AWS and Microsoft Azure best practices, including well architected and cloud adoption frameworks, coupled with our real world experience of architecting, building and operating cloud solutions at scale.

BENEFITS TO YOU

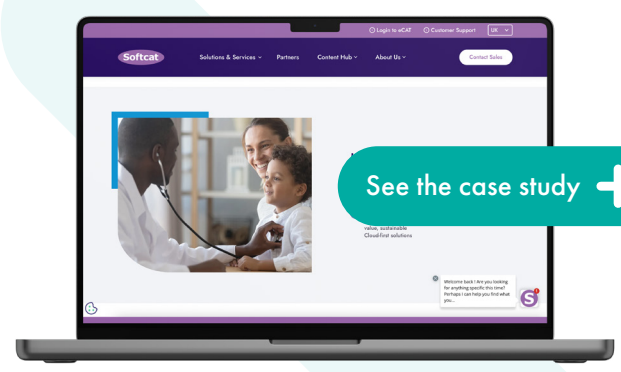

Softcat industry experts will develop a robust plan to help you achieve efficiencies within your cloud environment, including;

Reduce costs

Increase security posture

Increase reliability

Our assessments, coupled with ongoing services such as Softcat Cloud Fundamentals, help customers such as **NHS-Digital**

SUITABLE FOR YOU IF...

- ✓ Risks associated with cloud governance (cost, security, reliability) concern you.
- ✓ You want to optimise costs and security posture.
- ✓ You need a robust plan to achieve efficiencies within your environment.
- ✓ You want to make the most of your cloud environment.
- ✓ You are looking for recommendations to optimise your cloud costs, security, and reliability.

WHAT'S INCLUDED

Review of current challenges, concerns, and objectives – we'll take you through an initial workshop to understand your current state and create an action plan to help you build out the context of your cloud environment.

Automated data collection – our preferred, non-intrusive tooling collects data points from your environment for us to review, aligned with the context you provide.

Detailed recommendations – with their industry-leading experience, our cloud architects review the data to filter out risk and provide you with actionable insight to mitigate any issues.

WORKS WELL WITH

1. Softcat Cloud Billing & MarketPlace Services

Centralised management of your multi-cloud, SaaS and ISV commercial relationships.

2. Softcat Cloud Fundamentals Service

Centralised visibility and governance of your multi-cloud use, including ongoing FinOps and Cloud Architecture.

3. Softcat Security Breach Assessment

Identify vulnerabilities from a simulated cyber-attack, helping you to create a robust security posture, safeguarding your infrastructure from real breaches.
